6074 RR The Yield Leader.

Includes BrettYoung's Sclerotinia DefendR® tolerance trait.

- The Roundup Ready[®] canola variety with yields to challenge InVigor[®]
- Improved tolerance to Sclerotinia Stem Rot²
- Blackleg resistant
- Consistent performer with excellent harvestability

Features

| | CONTRACTOR CANADARY MADE IN MANAGEMENT | |
|-----------------|--|--|
| Yield: | 101% ¹ | |
| Blackleg: | R - C | |
| Major Gene ID: | Rlm 3 | |
| Sclerotinia: | IT ² | |
| Harvestability: | Excellent | |
| Maturity: | +1.7 days ¹ | |

Disease Management Rating

R = Resistant

IT = Improved Tolerance

¹Yield and maturity ratings based on relative to check performance in available Co-op, CPT and private trials.

²Improved tolerance versus susceptible varieties, using WCC/RRC-approved protocols.

Performance in Trials

DefendR[®] Genetic Traits

The DefendR symbol indicates above industry average levels of genetic resistance to one or more of the most important canola yield reducing factors. It represents the strength of the breeding programs of our primary canola breeding partners and a promise to canola growers that they are purchasing a variety that has exceptional yield potential and leading genetics for disease and/or harvest management.
